

# Nutriga Canza

(Dietary Supplement Product)  
(NUTRINAL (TM))

**“Prevention is better than cure.”**

Prevention + Cure 

**Nutraceuticals** refer to nutrients derived from food sources with health benefits.

Nutraceuticals are the hybrid of “Nutrition” from food and “Pharmaceutical” from medicine.

Nutraceuticals are defined as a “food, or parts of a food, that provide medical or health benefits including the prevention and treatment of disease”

according to Dr. Stephen De Felice – the Founder and Chairman of the Foundation for Innovation in Medicine (FIM).

## Nutrients

- Low efficiency
- Weak results
- No effect of physical intervention
- Prevent some diseases
- Long-term results
- Limited empirical evidence

## Pharmaceuticals

- High efficiency
- Targeted therapy
- With effect of specific physical intervention
- Cure some diseases
- Short-term results
- Massive empirical evidence

**Prevent risks of cancers**

Reduce severity during the spread of metastatic cancer cells

**Boost immunity**

Rich in antioxidants

**Reduce inflammation**

Help reduce infection

# Cause of Cancer

When cancer cells break away from a tumor, they can travel to other areas through either the bloodstream or the lymph system.

## 4 Stages of Cancer

- **Stage 1** : The tumor is only found in the cells where it started. It has not spread to any surrounding tissue.
- **Stage 2** : A larger tumor or a tumor that has grown deeper into nearby tissues
- **Stage 3** : It is referred to the locally advanced cancer that has grown into nearby tissues and lymph nodes until it gets a specific size.
- **Stage 4** : It is referred to metastatic cancer that has spread from its origin to distant parts of the body.

## Key ingredients in Nutriga Canza

### PLU KAOW

are found mainly in the Himalayas, India, China, South Korea, Vietnam, Japan and the Northern region of Thailand.

- It helps reduce risk of cancer
  - It contains Quercetin - a flavonoid that helps inhibit cancer cell growth.
- Inflammatory effect
  - Its essential oil found in more than 300 herbs has anti-inflammatory effect.
- Antioxidant
- It helps inhibit platelet aggregation.

### COENZYME Q10

imported from Japan is a vitamin-like substance found throughout the body. It helps deliver electrons that is fundamental in powering the body's energy production and promote normal functions of various systems requiring massive energy, especially heart, kidney, liver, and pancreas.

- Helps cells to produce energy and reduce cell damage caused by certain chemotherapy drugs.
- Helps reduce the risk of cancer
- Helps boost the immune system
- Helps reduce inflammation that is involved in causing various diseases including cancer.

### BETA-CAROTENE 10%

is a precursor to the synthesis of vitamin A that help boost the immune system. Beta-carotene is a red-orange pigment found in plants and fruits, especially colorful vegetables orange like pumpkin, carrot, baby corn.

- Helps reduce risk of cancer
- Acts as an antioxidant
- Helps maintain eye health to prevent the retinal degeneration

## Cause of Cancer

Source: National Cancer Institute of Thailand

### TOMATO

has anti-cancer properties. It is rich in Carotenoids including  $\alpha$ -carotene,  $\beta$ -carotene, lycopene, and lutein – the antioxidants that are mostly found in red and orange tomatoes. It helps reduce cancer cell growth, especially in prostate cancer, colon cancer, gastrointestinal cancer, breast cancer, and lung cancer,

- Helps reduce high blood pressure
- Helps prevent gallstones
- Helps brighten skin
- Helps inhibit growth of cancer cells
- Helps boost immune system
- Helps prevent accumulation of damaged cell causing risk of cancer

### GREEN TEA

Contains epigallocatechin-3-gallate (EGCG), an important catechin group, which is a flavonoid found in green tea that helps reduce risk of cancer, reduce inflammation and act as an antioxidant

- Helps reduce risk of cancer
- Helps reduce inflammation
- Acts as an antioxidant

### VITAMIN D3

It is essential for maintaining healthy bones and teeth. It also protects against a range of diseases and conditions.

- Helps reduce risk of cancer
- Helps boost the immunity system after surgery
- Helps absorb calcium in the body to strengthen bones.
