Survive in the host gastrointestinal tract

Still intact in the gut

Remain alive to function at its best in the intestines

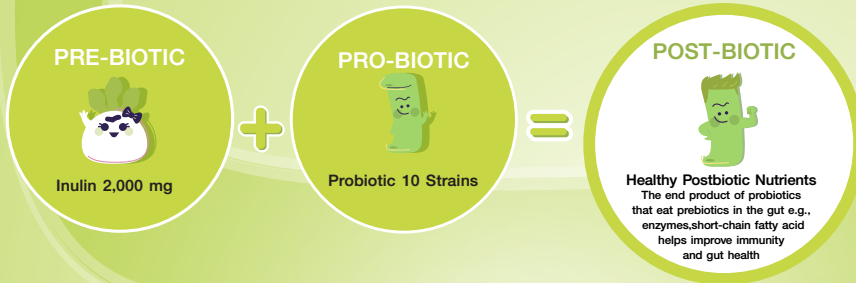

THE BOOSTER OF IMMUNIE AND DIGESTIVE HEALTH WHY PHYTOVY IS THE RIGHT PROBIOTIC FOR YOU?

PHYTOVY
PROBIOTIC

As we age, gut microbial diversity generally decreases. The imbalanced probiotics can cause the poorer digestive and excretory functions, unhealthy immune system, and higher risk of certain diseases.

Probiotic in the gut are fed by **prebiotic**. These two keys work together synergistically to promote the gutan intestine health by encouraging the growth of beneficial bacteria that can improve digestion and support the immune system. Healthy immunity of the body helps restore skin radiance, reduce aging marks, soothe acne and inflammation, relieve from anxiety, and keep psychological health in good shape.

5-LAYERED MICRO-ENCAPSULATION PROTECTION TECHNOLOGY

A 5-layered technology provides a protective shield to ensure that the live bacteria will be delivered to the intestine and still intact to work at its best.

PROBIOTIC 10 STRAINS 20,000 MILLION CFU FROM TAIWAN
