

WLTIMATCH

ROLL ON FOR MEN & WOMEN

Chamomile Extract, Vitamin B3 and Jojoba oil provide anti-irritation properties help brighten your skin and keep your underarm fresh

Reduces sweat production

prevents odor-causing bacterial growth

for up to

What are the causes of body odor?

Sweat and body odor are usually caused by scent glands (Apocrine gland). Apocrine sweat glands are mainly found in the armpits and present at birth; however, these glands start to function at puberty. The role of apocrine sweat glands associated with humans is to produce a sexual scent. Substances secreted from apocrine sweat glands are oily, odorless, and thick fluids consisting of various fatty acids, namely fatty acid, sulfanyl alkanols, and steroids. When the fluid is leaking out onto the skin surface, Corynebacterium spp. converts the fluid to sweaty odors which are called Ammonia and short-chain fatty acids.

Risk factors may make you more prone to getting body odor.

being overweight

stress

diabetes

some medications

alcohol drink

Tips for preventing Body Odor

Avoid eating food and drinks high in fat and sugars

Cutting down on alcohol

Avoid eating strong-flavored foods

Key factors

Of preventing body odor and keeping your underarm fresh and clean are thereby reducing the amount of sweat to help kill odor-causing bacteria

Key ingredients **ULTIMATCH**

Deodorants

prevents odor-causing bacteria

Kae Lae Leaf Extract

- eliminates bacteria by Prenvlflavonoids
- reduces inflammation

Mangosteen Extract

reduces inflammation

Anti-Irritation

caused by chronic exposure to known irritant chemicals

Chamomile Extract

 anti-Inflammatory ingredient for irritated skin

Allantoin

- soothes your skin
- reduces inflammation

Moisturizer

provides moisture for skin

Jojoba Oil

 coated with a thin film that provides moisture for skin

Mushroom Extract

- minimizes your pores
- reduces the occurrence of Keratosis Pilaris (Chicken Skin)

Whitening Agent

helps brighten your skin

Niacinamide

• brightens and evens skin tone

Licorice Root Extract

inhibits Tyrosinase activity by Glabridin

Antiperspirants

reduces sweat production

Aluminium Chlorohydrate: **ACH**

 The optimal pH value of skin on armpits lies between 4.7 and 5.75 low-irritation
