Hybrid Sunscreen

Hybrid sunscreen can provide
comprehensive UV protection.

- Reflects UV rays physically and absorbs them chemically.
- Lightweight and easy to use.
- A small amount is enough for skin protection.
- Instantly protects the skin upon application - no need to wait.
- Suitable for sensitive skin, children, and pregnant women.
- Can be used with other products.
- Does not leave residues or clogged pores.

5 essential tips for correctly applying sunscreen to truly protect your skin

15 min

Apply sunscreen about 15 minutes before going outside to allow it to become effective.

Use about 2 index fingers' worth of product to ensure full coverage.

Choose Sunscreen with SPF 30 or Higher.

Apply Daily, Including Cloudy Days.

Reapply Every 1-2 Hours before doing outdoor activities.
