## Hyaluronic acid

Maintains skin moisture and retains water in the skin for longer.

No alcohol

No artificial color

Nourishes the skin

Reduces skin inflammation

Maintains moisture

Reduces wrinkles

Stimulates collagen production

Relieves sunburn

# Important Extracts

Nano CoQ10 is a CoQ10

that is developed to have a smaller particle size at the nano level, allowing it to penetrate deeply and quickly into the skin. It helps stimulate energy production in cells, which is necessary for the process of repairing and restoring skin cells. It acts as a highly effective antioxidant, reducing cell damage from UV rays and pollution. It helps stimulate the production of collagen and elastin, making the skin smooth and reducing wrinkles

## Ascorbyl Tetraisopalmitate

Protects skin from free radicals, penetrates deep into the skin to stimulate collagen production, reduces wrinkles and deep lines, and promotes skin firmness and elasticity.

## Tremella Fuciformis Extract (Phyto Hyaluronic Acid WSK)

The extract of wood ear mushroom (*Tremella fuciformis*) is nicknamed as "Natural Hya" or natural Hyaluronic Acid because it is rich in Polysaccharides, giving it excellent water-holding and moisturizing properties, similar to Hyaluronic Acid (HA), which is an important substance in maintaining skin moisture as well as helping to fight free radicals, stimulate collagen, and reduce inflammation.

## Flavonoid there are 2 types of flavonoids

1. Luteolin is derived from *Citrus Renicalata*, a citrus fruit.
  2. Myricetin is derived from *Myrica Rabra*, a Chinese strawberry.
- It helps to moisturize and firm the skin and also has antioxidant properties.

## Scutellaria Baicalensis Extract

Helps protect skin from inflammation, dullness and wrinkles and also strengthens the skin.

## Tocopherol

Helps fight free radicals, increase moisture, reduce inflammation and protect skin from pollution and UV rays.

**How to use** Apply thinly to the desired area and for best results apply evenly.

Facial skin

Body skin
